Futura Series 5

From $6,595

Description

Futura Series 5 â€“ Built for the Boat, Built for New Zealand

Upgrade your boat with a trailer thatâ€™s engineered to go the distance.

The Futura Series 5 is the perfect trailer for boat owners who want **strength, reliability, corrosion resistance and effortless launching** â€” without the weight and maintenance associated with traditional steel trailers.

Built from **marine-grade anodised aluminium**, the Series 5 is lightweight yet incredibly strong, making towing easier while helping protect your investment from New Zealandâ€™s harsh saltwater environment.

The **weld-free chassis design** is a major advantage, eliminating traditional weld points that can crack or become vulnerable to corrosion. Futura also uses anodised aluminium axles and premium stainless-steel components for long-term durability.

And it looks the part too â€” with its sleek, modern aluminium construction and integrated wiring and lighting, the Futura Series 5 gives your boat package a premium finish while delivering the performance to match.

Why settle for an ordinary trailer when you can have a Futura?
