

Bravo Three XR® Drive

POA

Description

Bravo Three XR® Drive FEATURES Counter rotating dual propeller, sleek new shape and hot new graphics highlight Mercury Racing's newest drive. New cone clutch and shift engagement strategy. SmartCraft® electronic engine management makes shifting into and out of gear smooth as silk, making docking much easier. The Mercury Racing Integrated Transom System (ITS), available as an option, simplifies installation and features integral power steering cylinders. Precision-shimmed net-forged steel bevel gears for more strength and durability. Reinforced ribbed top cap & steel chimney reliability secure bearings under high load.
