

Mercury Bravo I® FS Outboard

POA

Description

The Mercury Racing® **Pro Finish Bravo I FS** outboard propeller offers excellent time-to-plane performance, sweet mid-range punch, and awesome top-end speeds for bass, flats, cat flats, and performance center-console bay boats. The stainless steel prop, designed for use on 150 hp to 350 hp four strokes including Mercury Verado®, Mercury Pro FourStroke, and competitor-brand engines, features four robust blades and a tuned exhaust tube. The shortened exhaust tube provides greater top-end speed, while minimizing stern lift for improved boat handling and performance.

SPECIFICATIONS

Pitch 22°, 23°, 24°, 25°, 26°, 27°, 28°, 29°, 30°, 31°

Rotation RH, LH

Finish Pro Finish

APPLICATIONS

Contact Mercury Racing Performance Propeller Manager Scott Reichow at 920-924-2037 regarding propeller applications and performance.
