

Suzuki DF2.5 4 Stroke

\$960.00

Description

An outboard designed with user-friendly features, is an outboard that lets you enjoy more of your time on the water. That's why the DF2.5 is equipped with a twist-grip throttle for easier operation from different sitting positions, and full-turn 360° steering, which is advantageous when maneuvering in tight places and also delivers superior thrust when backing.

Operation is quiet and smooth, and the engine is water-cooled for increased durability and dependability. And a large capacity integrated fuel tank holds one-liter of fuel, which provides an estimated operating time of almost an hour on a full tank.

Other features include steering and throttle tension adjuster systems, F-N shifting located on the starboard side just where you'd expect, and an oil level indicator conveniently located on the port side for easy oil checks.
